ABOUT ME

DevSecOps Engineer in Eustema's R&D team, part of the Lutech group, with over three years of company experience and fully remote work since April 2024. I build Kubernetes platforms and GitOps pipelines, integrate security controls and develop Python microservices. My experience includes GPU-based LLM serving, MLflow operations and RAG evaluation. Interested in fully remote opportunities.

WORK EXPERIENCE

DEVSECOPS ENGINEER – EUSTEMA S.P.A. – 07/2025 – Current – ITALY

Fully remote.
- Designed shared templates and GitLab CI pipelines with Argo CD GitOps promotion, reusing the same image across environments and requiring manual approval for production.
- Integrated SBOMs, vulnerability scanning, provenance and Cosign signatures, verifying the signed image digest before each promotion.
- Migrated MLflow while preserving data and endpoints. Operated Kubernetes LLM serving with KubeAI and vLLM, persistent storage and GPU allocation.
- Developed FastAPI microservices and shared libraries for configuration, audit and authorization. Standardized probes, JSON logging and tracing context propagation.
- Recovered 20% of cluster storage through resource assessment and archived PVC cleanup. Delivered template documentation and practical workshops, followed by an independently completed pipeline in another team.

DEVOPS DEVELOPER – EUSTEMA S.P.A. – 04/2024 – 07/2025 – ITALY

Fully remote.
- Built Coder remote development environments on Kubernetes with Terraform templates, Docker and GPU workspaces, and developer onboarding.
- Optimized document ingestion through parallelization tests: processing 130 documents took 2h43 instead of 4h06 with two replicas.
- Rewrote GitLab export automation and exported 149 projects to NFS. Managed Kubernetes services, backups and releases in cloud acceptance environments.

SOFTWARE DEVELOPER – EUSTEMA S.P.A. – 04/2023 – 04/2024 – ITALY

Hybrid.
- Containerized services and prepared Kubernetes manifests to move an AI platform from research into production on GKE.
- Ran Bandit SAST analysis and load tests, contributing to the diagnosis of ingress, probe and service availability issues.

COMPANY INTERNSHIP AND EXPERIMENTAL CLOUD BURSTING THESIS – EUSTEMA S.P.A. – 10/2022 – 04/2023 – ITALY

- Developed a proof of concept for automatic K3s cluster expansion across two OpenStack environments, with containerized services and load tests based on Azure Functions traces.

SKILLS

Kubernetes, GKE, AWS deployments, Docker, Helm, Kustomize, Linux, NFS, MetalLB, NGINX Ingress | GitLab CI, Argo CD, GitOps, CI/CD, rollback, multiarch builds, Terraform (Coder) | Syft, Grype, Cosign, SBOM, signatures, attestations, Bandit SAST, Keycloak, JWT, RBAC | MLflow, KubeAI, vLLM, Ollama, NVIDIA GPU, MinIO, Langfuse, RAG evaluation, DeepEval | Python, FastAPI, Pydantic, Bash, MongoDB, PostgreSQL, Elasticsearch, Neo4j, NATS, Temporal | OpenTelemetry, JSON logging, health checks, load testing, documentation, onboarding

EDUCATION AND TRAINING

2023
MSC IN COMPUTER AND ROBOTICS ENGINEERING University of Perugia

Data Science curriculum. Grade: 110/110 cum laude. Thesis on Kubernetes-based cloud bursting.

2020
BSC IN COMPUTER AND ELECTRONIC ENGINEERING University of Perugia

Grade: 99/110. Thesis on data center network architecture.

2023
MICROSOFT CERTIFIED AZURE FUNDAMENTALS AZ-900 Microsoft

Fundamentals certification.

2025
AI AGENTS FUNDAMENTALS Hugging Face

Course completion certificate.

LANGUAGE SKILLS

Mother tongue(s): **ITALIAN**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1
FRENCH	A1	A1	A1	A1	A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

Publications

First author of A System for Comprehensive Assessment of RAG Frameworks, arXiv technical report, 2025. Coauthor of Attribute-Based Management of Secure Kubernetes Cloud Bursting, IEEE Open Journal of the Communications Society, 2024.
arXiv 2504.07803 | IEEE DOI

Open source contributions

Merged pull requests in Coder, KubeAI and CheshireCat covering Helm, networking and container connectivity. I maintain personal cross-platform Docker projects, including money4band.
Coder #16032 | KubeAI #362 | CheshireCat #857 | GitHub MRColorR
